

Debayer Example

Using a ZWO ASI120MC with *Colour Space = RAW8* and *Output Format = AVI*.

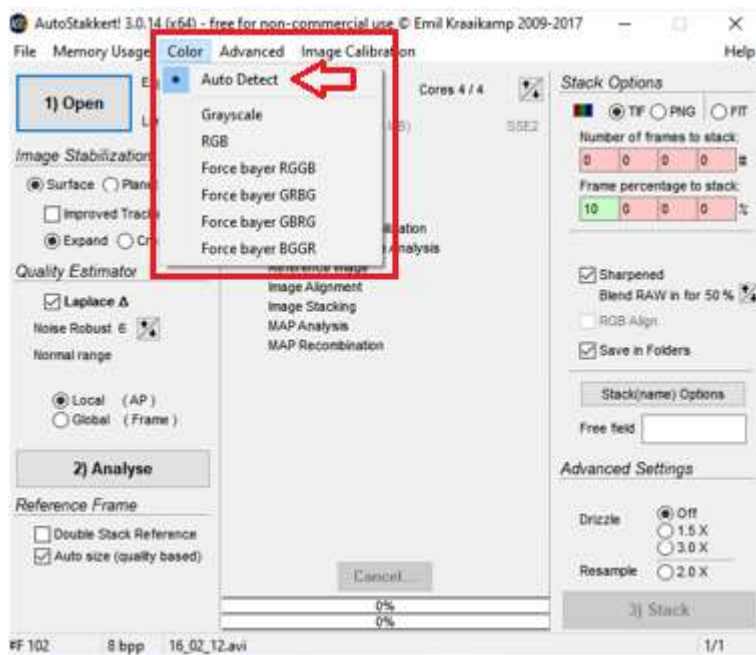

Notice that the colours are displayed accurately by SharpCap – red brick and green trees.

A 100 frame AVI video was captured. The video was loaded into Autostakkert and showed as grey with a dotted pattern.

This is because Autostakkert cannot auto decode the colours stored in the AVI file.

Debayer Example

Choose *Force bayer GRBG*. Two things will happen:

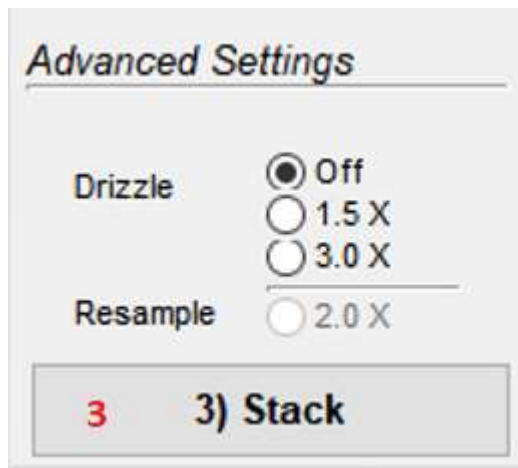

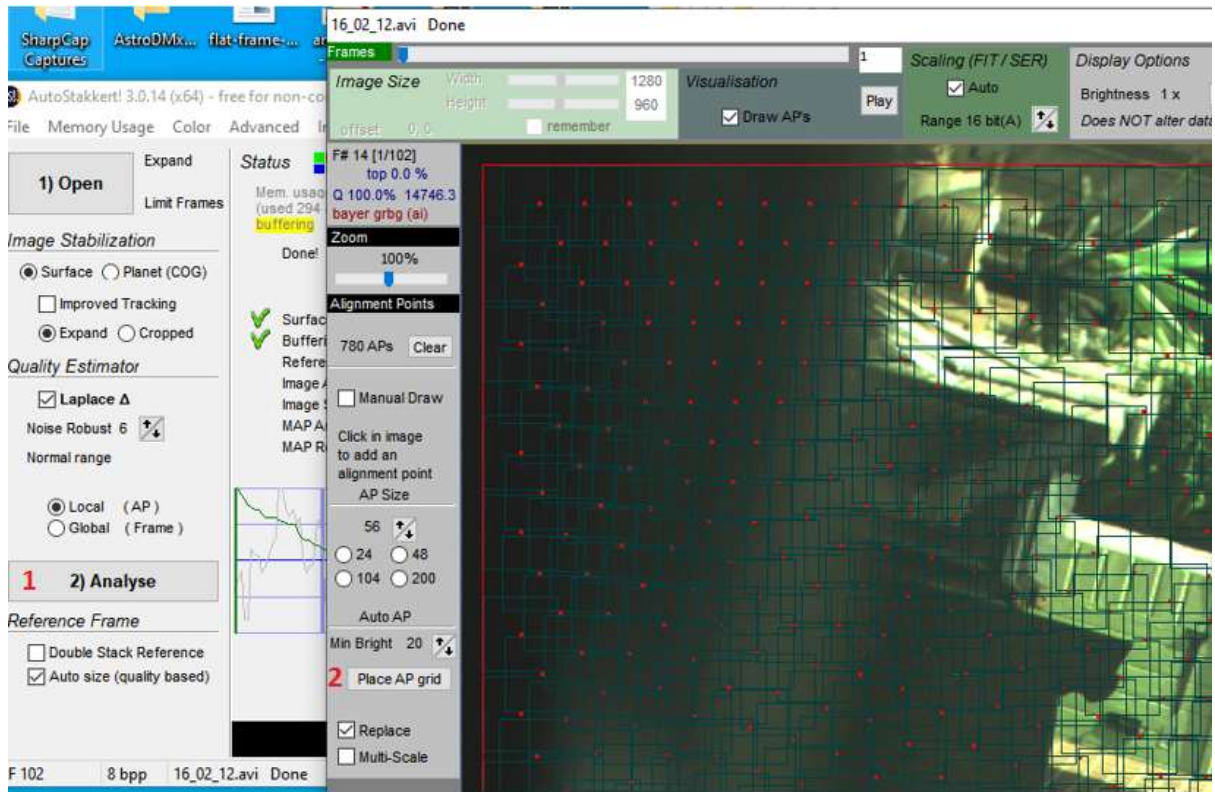

1. The grid pattern is removed.
2. The correct colours return.

Debayer Example

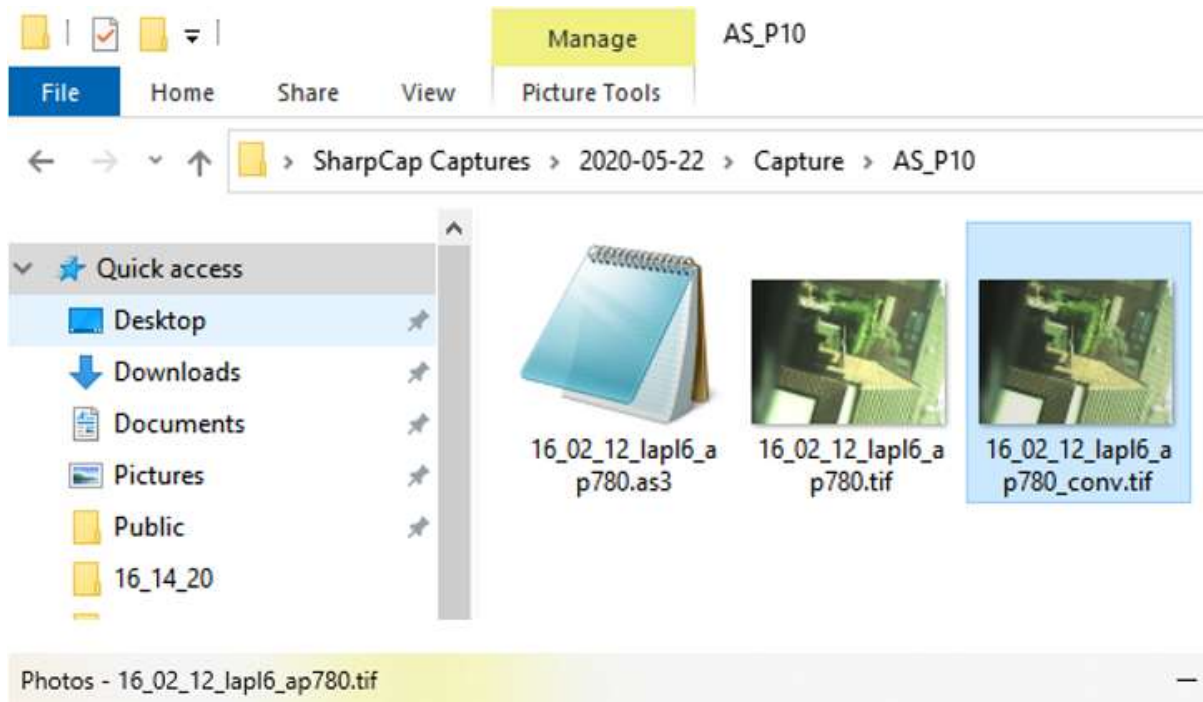

To complete the stack process, click on

1. Analyse
2. Place AP grid
3. Stack.

Debayer Example

A folder will be created containing one or more images.

Click on one of these to open. A stacked image is shown.
